

Community Development Department

BISMARCK PLANNING AND ZONING COMMISSION SPECIAL MEETING AGENDA October 15, 2020

Tom Baker Meeting Room

5:00 p.m.

City-County Office Building

Watch live meeting coverage on Government Access Channels 2 & 602HD, listen to Radio Access 102.5 FM Radio, or stream FreeTV.org and RadioAccess.org. Agenda items can be found online at www.bismarcknd.gov/agendacenter.

Due to ongoing public health concerns related to COVID-19, the City of Bismarck is encouraging citizens to provide their comments for public hearing items on this agenda via email to planning@bismarcknd.gov. The comments will be sent to the Planning and Zoning Commissioners prior to the meeting and included in the minutes of the meeting. To ensure your comments are received and distributed prior to the meeting, please submit them by 12noon on the day of the meeting and reference the agenda item your comment addresses.

If you would like to appear via video or audio link for a 3-5-minute comment on a public hearing item, please provide your e-mail

address and contact information to planning@bismarcknd.gov at least one business day before the meeting.

The physical meeting room will be open to the public, but we certainly understand the public wishing to limit their exposure at this time, while still participating in government. Before entering the City-County Office Building, all individuals should self-screen for COVID-19 symptoms or potential exposure and, if unable to pass the screening protocol, will be expected to participate remotely in the meeting for the public's safety.

Some of the Planning and Zoning Commissioners will be attending this meeting in person, but it is anticipated that most will participate remotely. The number of meeting participants attending in person in the Tom Baker Meeting Room, including the Planning and Zoning Commissioners, will be limited to maintain social distancing.

Staff recommendation: approve ☐ approve ☐ continue ☐ table ☐ deny

OTHER BUSINESS

- 6. Other Business**

ADJOURNMENT

- 7. Adjourn.** The next regular meeting date is scheduled for **October 28, 2020.**

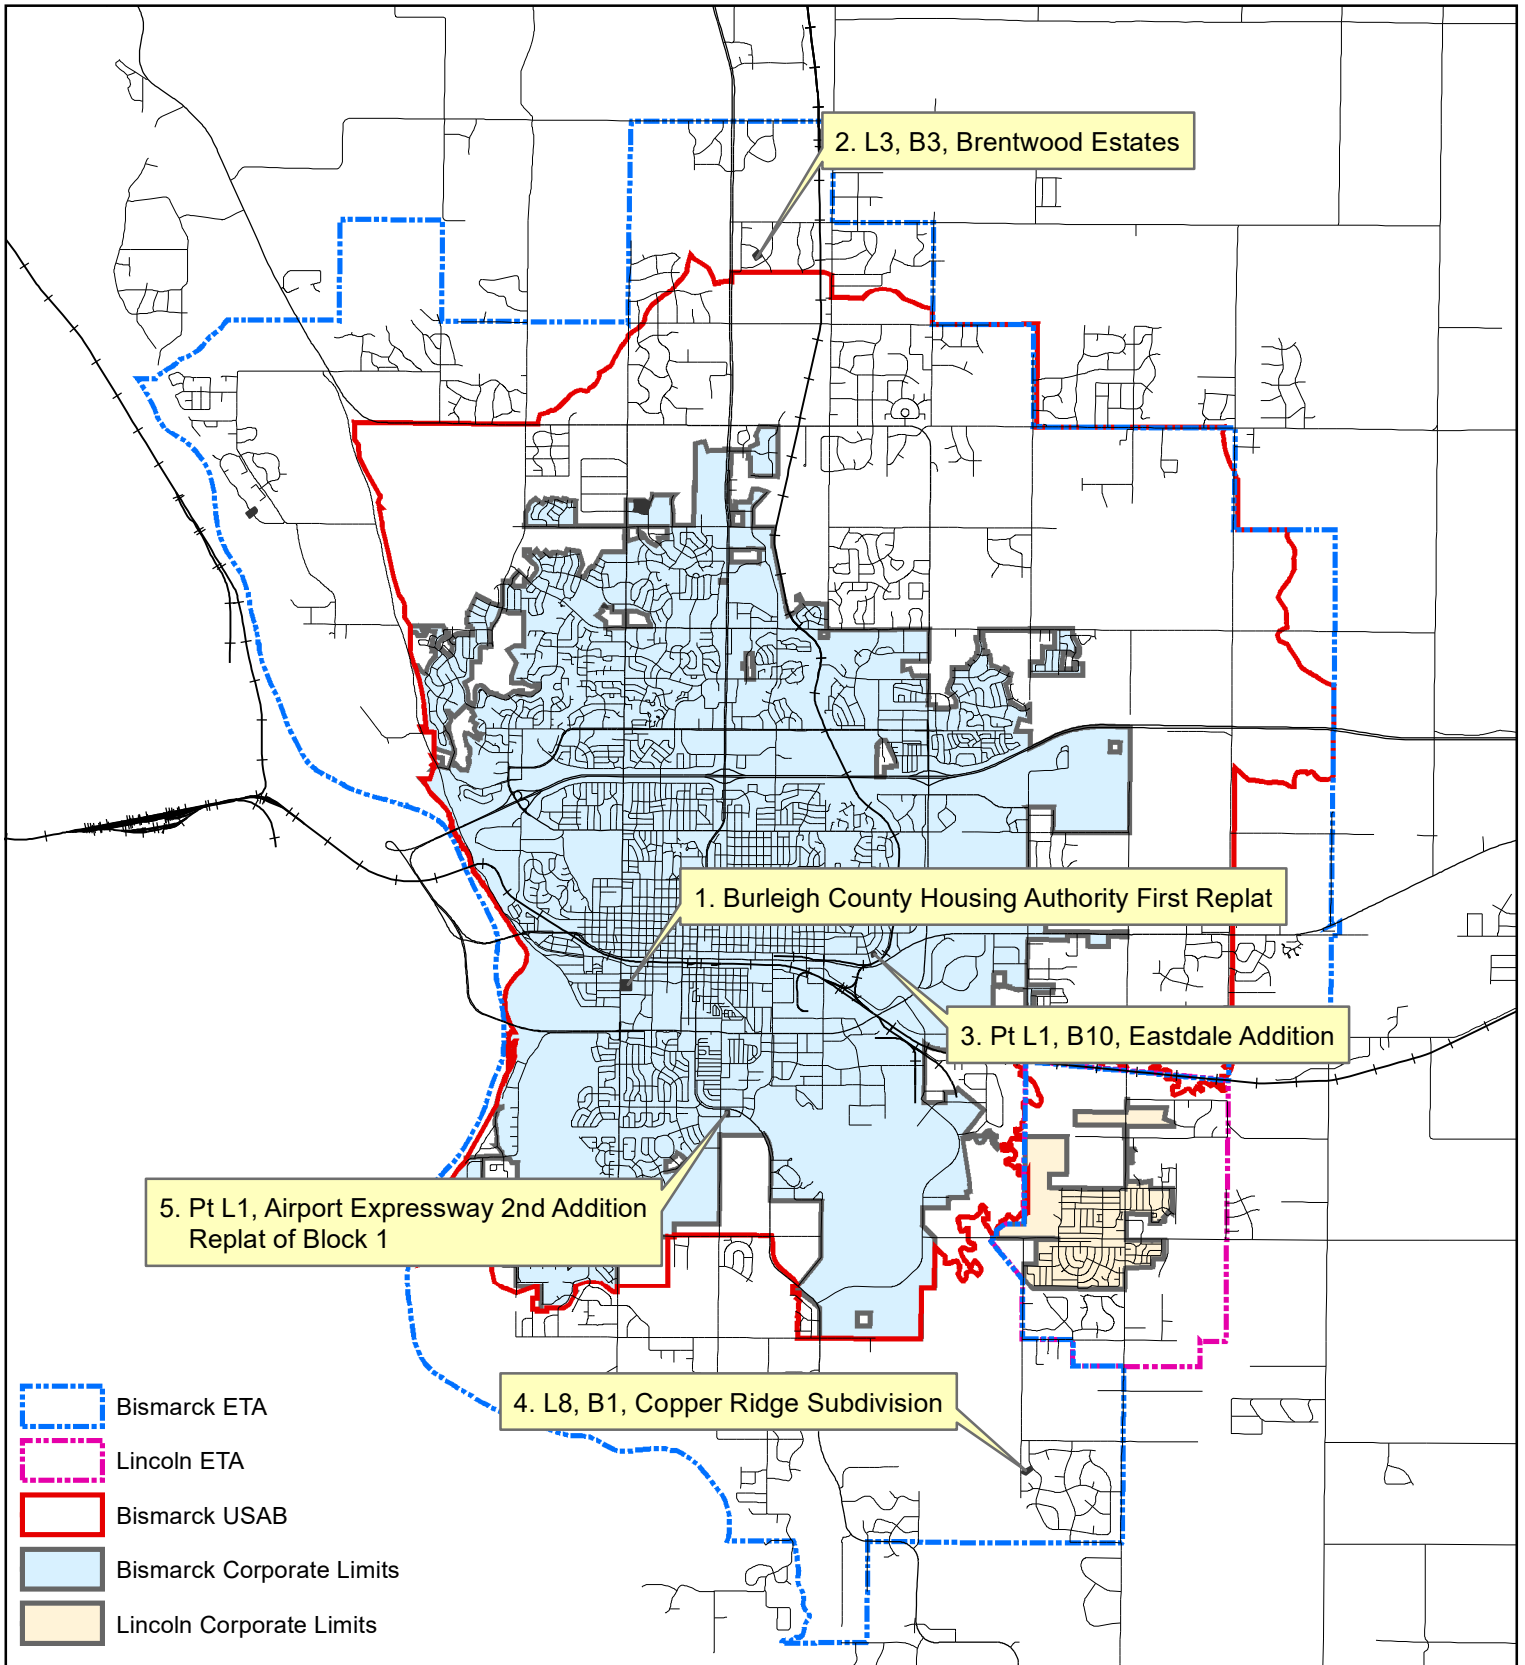

BISMARCK PLANNING AND ZONING COMMISSION PUBLIC HEARING PROCEDURE AND PROTOCOL

All public hearings before the Bismarck Planning and Zoning Commission will follow the same basic format. This outline has been prepared to help you understand the procedure and protocol.

1. The Chair of the Planning and Zoning Commission will introduce the item on the agenda and ask staff to present the staff report.
2. The Planner assigned to the file will present the staff report on the item. The presentation will be an overview of the written staff report included in the agenda packet, which is posted on the City's website by the end of the day on the Friday before the meeting.
3. The members of the Planning and Zoning Commission may ask staff questions about the request itself or staff's recommendation, but they will not discuss the request prior to obtaining input from the public.
4. The Chair of the Planning and Zoning Commission will then open the public hearing on the request and ask if anyone would like to speak to the Commission.
5. The applicant or his or her designated agent is usually given the courtesy of speaking first to outline the proposal and/or clarify any information presented by staff. The applicant may speak at this time or wait until others have spoken.
6. The public hearing is then opened to the public to voice their support, opposition or to ask questions about the proposal. Please write your name and address on the sign-in sheet, step up to the podium, speak clearly, state both your first and last names and your address, then your comments. Speaking over the microphone rather than directly into it will provide the best audio quality. Also, please avoid tapping or banging the podium, as the microphone amplifies the sound. Your comments as well as any materials distributed to the Planning and Zoning Commissioners at this time will be made part of the public record. If you would prefer to provide written materials to staff at the beginning of the meeting, we will distribute the materials to the Commission for you.
7. Please be respectful of the Planning and Zoning Commissioners, staff and others speaking on the request. Personal attacks against the applicant or others, clapping/cheering or booing speakers is not acceptable. Staff and the applicant will only respond to questions from the Planning and Zoning Commissioners, not questions directly from those speaking at the public hearing.
8. Everyone who wishes to speak will be given a chance to speak; however, at larger public hearings, the Chair may ask speakers to limit their time at the podium to five minutes, not repeat previous testimony/comments and only speak once. Members of the Planning and Zoning Commission may ask questions of those speaking, but may also listen and deliberate after the hearing is closed.
9. After everyone in the audience wishing to speak has given his or her comments, the Chair will close the public hearing portion for the agenda item. No additional comments from the public are allowed after the hearing has been closed. At this point, the Chair will ask staff if they have any additional information or final comments.
10. The Planning and Zoning Commissioners will then discuss the proposal. They may ask staff or the applicant additional questions or for clarification of items stated during the public hearing. At the conclusion of the discussion, the Commission will make its recommendation or decision.

Staff Analysis

The Planning and Zoning Commission held a public hearing on this request on Wednesday, September 23rd and recommended approval of the request.

However, due to a publication error in the Bismarck Tribune, a new public hearing must be held in order to meet the City's notification requirements. The public
(continued)

has been re-notified of this request; a new notice was published in the Bismarck Tribune on October 2nd and 9th and new letters were mailed to the owners of nearby properties on October 2nd.

Housing Authority of Burleigh County is requesting approval of a minor subdivision final plat titled Burleigh County Housing Addition First Replat.

Approval of the proposed minor subdivision plat would allow for the future development of new and replacement multi-family housing for the Burleigh County Housing Authority.

Adjacent uses include commercial auto repair and retail uses to the north across West Bowen Avenue, multi-family uses to the east and south across East Indiana Avenue and multi-family and single and two-family uses to the west across South Washington Street.

Off-site stormwater and drainage easements will be required for the proposed plat. These easements must be approved and recorded prior to the recordation of the plat.

Required Findings of Fact (relating to land use)

1. All technical requirements for approval of a minor subdivision final plat have been met;
2. The City Engineer has conditionally approved the Post-Construction Stormwater Management Permit (PCSMP), with the understanding that prior the recordation of the plat off-site stormwater and drainage easements are required for the area within Lots 17 and 22, Block 1, Burleigh Housing Addition inundated by the local site 100-year stormwater modeling.
3. The proposed subdivision is located within the Special Flood Hazard Area (SFHA), also known

as the 100-year floodplain. However, the subdivision is proposed to be developed according to existing ordinance requirements pertaining to development in the floodplain and therefore, the proposed development would not adversely impact water quality and/or environmentally sensitive lands;

4. The proposed subdivision is consistent with the general intent and purpose of the zoning ordinance;
5. The proposed subdivision is consistent with the master plan, other adopted plans, policies and accepted planning practice; and
6. The proposed subdivision would not adversely affect the public health, safety and general welfare.

Staff Recommendation

Based on the above findings, staff recommends approval of the minor subdivision final plat for Burleigh County Housing Addition First Replat, with the understanding that:

1. Off-site stormwater and drainage easements are approved and recorded prior to recordation of the final plat.

---------------	----------	-----------------	---------	-----------------	-----

Staff Analysis

The Planning and Zoning Commission held a public hearing on this request on Wednesday, September 23rd and approved the request. However, due to a publication error in the Bismarck Tribune, a new public hearing must be held in order to meet the City's

notification requirements. The public has been re-notified of this request; a new notice was published in the Bismarck Tribune on October 2nd and 9th and new letters were mailed to the owners of nearby properties on October 2nd.

Frank and Brenda Kelsch are requesting approval of a special use permit to increase the total allowable square footage of accessory structures on the lot to 3,000 square feet, which would allow construction of a new 2,000 square-foot accessory building. The applicant has indicated that there is an existing 720 square foot accessory building and a 280 square foot accessory building located on the property that will remain.

Adjacent uses include rural residential uses in all directions.

Section 14-03-06(1)(b)(5) of the City Code of Ordinances (Accessory Uses and Buildings) states, “the allowable accessory buildings for a single-family rural residence on a lot in a rural residential zoning district (RR & RR5) with more than 65,000 square feet in area may be increased to a maximum of thirty-two hundred (3,200) square feet provided a special use permit is approved by the Planning Commission in accordance with the provisions of Section 14-03-08 of the City Code of Ordinances (Special Uses).”

The parcel size for the proposed special use is 2.7 acres or 111,032 square feet and meets the criteria for a maximum allowable size of 3,200 square feet for all accessory buildings located on the property.

According to the site plan submitted by the applicant, the proposed accessory buildings would meet setback requirements for an accessory building located within the RR – Residential zoning district.

Required Findings of Fact (relating to land use)

1. The proposed special use complies with all applicable provisions of the zoning ordinance and is consistent with the general intent and purpose of the zoning ordinance;
2. The proposed special use is compatible with adjacent land uses and zoning;

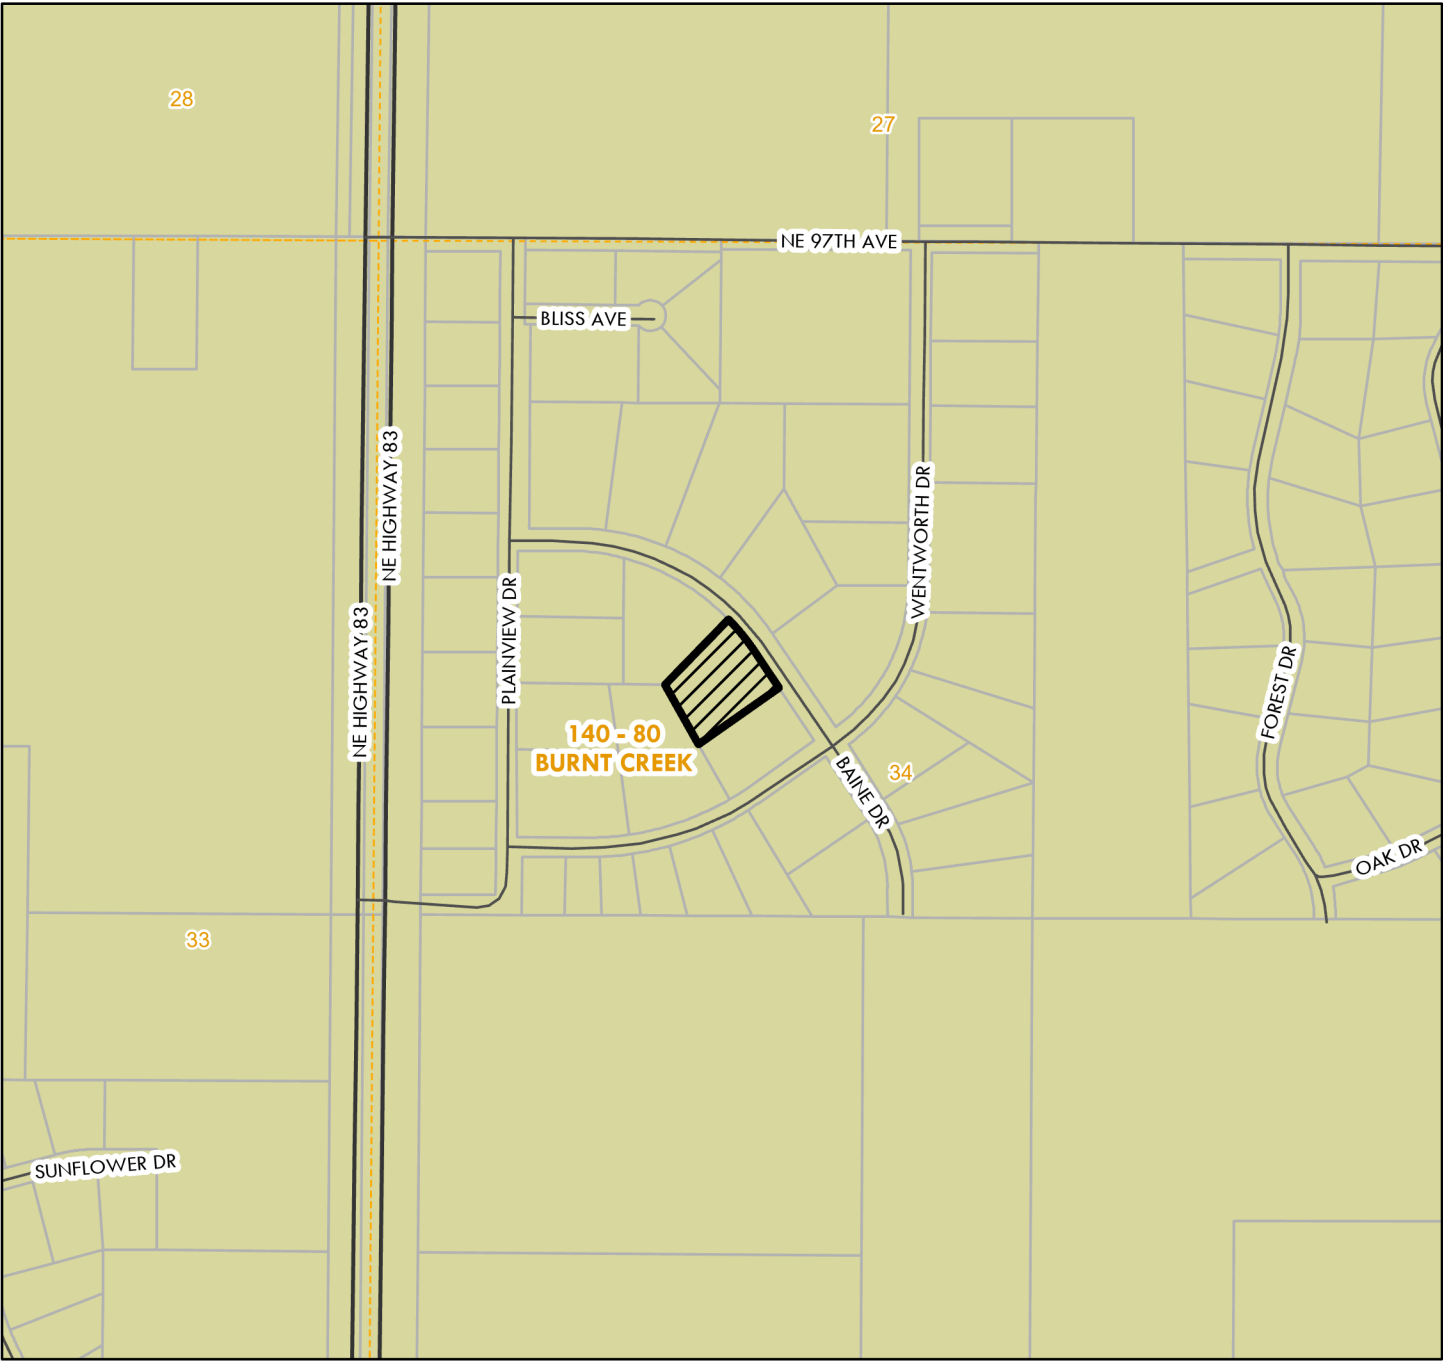

3. The proposed special use would be designed, constructed, operated and maintained in a manner that is compatible with the appearance of the existing or intended character of the surrounding area;
4. Adequate public facilities and services are in place or would be provided at the time of development;
5. The proposed special use would not cause a negative cumulative effect, when considered in conjunction with other uses in the immediate vicinity;
6. Adequate measures have been or would be taken to minimize traffic congestion in the public streets and to provide for appropriate on-site circulation of traffic;
7. The proposed special use is consistent with the master plan, other adopted plans, policies and accepted planning practice; and
8. The proposed special use would not adversely affect the public health, safety and general welfare.

Staff Recommendation

Based on the above findings, staff recommends approval of the special use permit to increase the total area of accessory buildings to 3,000 square feet by constructing a 2,000 square foot accessory building on Lot 3, Block 3, Brentwood Estates.

Staff Analysis

The Planning and Zoning Commission held a public hearing on this request on Wednesday, September 23rd and approved the request. However, due to a

publication error in the Bismarck Tribune, a new public hearing must be held in order to meet the City's notification requirements. The public has been re-

(continued)

notified of this request; a new notice was published in the Bismarck Tribune on October 2nd and 9th and new letters were mailed to the owners of nearby properties on October 2nd.

Jan Joersz is requesting approval of a special use permit to allow the operation of a dog training facility/animal kennel on Lot 2 of Lot A of Lot 1, Block 10, Eastdale Addition.

Adjacent uses include a distribution center to the north across East Broadway Avenue, an office building to the east, and light industrial uses to the south and west.

The proposed facility would provide dog obedience training, interior and exterior exercise space, grooming services, retail, and group and private education classes. According to the applicant no animals will be kennelled overnight but overnight kenneling would be permitted with approval of this special use permit.

The following criteria from Section 14-03-08(4)(k) of the City Code of Ordinances (Special Uses/Animal hospital or kennel) apply:

1. *The structure shall be sufficient to meet the requirements set forth by the Animal and Plant Health Service, Department of Agriculture.*

The applicant has reviewed these requirements and, based on a narrative provided by the applicant, the proposed structure would be modified sufficiently to meet these requirements.

2. *The structure's setback lines be approved by the city planning and zoning commission on a case-by-case basis, but in no case shall they be less than twenty-five (25) feet.*

The proposed facility would be located in an existing building. The current setbacks are less than 25 feet but do meet the setback requirements for the MA – Industrial zoning district. Since this is an existing structure staff is recommending that the Planning and Zoning Commission waive this requirement.

3. *The hospital or kennel must be maintained within a completely enclosed sound resistant building. The building must contain adequate heating and*

the ventilation system must have filters incorporated so as to absorb all objectionable inside odors.

The building is currently insulated, and the applicant intends to add additional sound proofing material as needed. An assessment of the ventilation system will be conducted, and the applicant has indicated that necessary changes will be made to provide better odor-free air flow.

4. *If any exercise yard, run or corral is maintained without an enclosed structure provided they must be shielded from view, the sound muffled by a fixed and immovable barrier, and no residence or residentially zoned area may be located closer than one thousand (1,000) feet to any such facility.*

The proposed exercise yard is an area currently fenced and additional solid fencing will be added to shield the area from view and muffle sound where needed.

5. *The building must be constructed so as to contain sound and odor in such a way as to produce no objectionable noise or odor outside the building.*

The building is fully insulated and sheetrocked which the applicant indicated will ensure the isolation of noise and odor. The applicant has indicated that additional cleaning and sound protocols will be implemented and upgraded as needed.

6. *Off-street parking space be provided at a rate of three (3) spaces per doctor and one and one-half (1-1/2) additional spaces for every employee.*

The proposed facility is not an animal hospital and will not employ any doctors. The applicant has indicated there will be between 5 and 8 employees which would require a total of 12 spaces. There are currently 14 off-street spaces on site.

(continued)

Required Findings of Fact (relating to land use)

1. The proposed special use complies with all applicable provisions of the zoning ordinance and is consistent with the general intent and purpose of the zoning ordinance;
2. The proposed special use is compatible with adjacent land uses and zoning;
3. The proposed special use would be designed, constructed, operated and maintained in a manner that is compatible with the appearance of the existing or intended character of the surrounding area;
4. Adequate public facilities and services are in place or would be provided at the time of development;
5. The proposed special use would not cause a negative cumulative effect, when considered in conjunction with other uses in the immediate vicinity;
6. Adequate measures have been or would be taken to minimize traffic congestion in the public streets and to provide for appropriate on-site circulation of traffic;
7. The proposed special use is consistent with the master plan, other adopted plans, policies and accepted planning practice; and
8. The proposed special use would not adversely affect the public health, safety and general welfare.

Staff Recommendation

Based on the above findings, staff recommends approval of the special use permit to allow the operation of a dog training facility/animal kennel including the waiver of the 25 foot setback requirement on Lot 2 of Lot A of Lot 1, Block 10, Eastdale Addition with the following condition:

1. The proposed facility must meet all requirements outlined in Section 14-03-08(4)(k) of the City Code of Ordinances.

Staff Analysis

The Planning and Zoning Commission held a public hearing on this request on Wednesday, September 23rd and approved the request. However, due to a publication error in the Bismarck Tribune, a new public

hearing must be held in order to meet the City's notification requirements. The public has been re-notified of this request; a new notice was published in the Bismarck Tribune on October 2nd and 9th and new

(continued)

letters were mailed to the owners of nearby properties on October 2nd.

Daryl Ressler is requesting approval of a special use permit to increase the total allowable square footage of accessory structures on the lot to 3,200 square feet, which would allow construction of a new 3,200 square-foot accessory building. This structure would contain an accessory dwelling unit in a portion of the building.

Adjacent uses include rural residential uses to the north, east, and south, and undeveloped agricultural land to the west.

Section 14-03-06(1)(b)(5) of the City Code of Ordinances (Accessory Uses and Buildings) states, "the allowable accessory buildings for a single-family rural residence on a lot in a rural residential zoning district (RR & RR5) with more than 65,000 square feet in area may be increased to a maximum of thirty-two hundred (3,200) square feet provided a special use permit is approved by the Planning Commission in accordance with the provisions of Section 14-03-08 of the City Code of Ordinances (Special Uses)."

The parcel size for the proposed special use is 1.95 acres or 85,208 square feet and meets the criteria for a maximum allowable size of 3,200 square feet for all accessory buildings located on the property.

According to the site plan submitted by the applicant, the proposed accessory buildings would meet setback requirements for an accessory building located within the RR – Residential zoning district.

For the proposed accessory dwelling unit, The following criteria from Section 14-03-08(y) of the City Code of Ordinances (Special Uses/Accessory Dwelling Units) apply:

1. *No more than one accessory dwelling unit may be permitted on each lot or parcel.*

Approval of only one unit is being requested.

2. *An accessory dwelling unit must be contained completely within the principal structure on the lot or parcel, or contained within an accessory structure that meets all requirements of this Code, including size and setback requirements of*

the underlying zoning district. However, the height of any accessory dwelling unit may be up to twenty (20) feet or the height of the principal structure on the lot, whichever is less.

The accessory dwelling unit will be contained within an accessory structure that meets all requirements for the zoning district.

3. *The principal or accessory dwelling unit must be occupied by the owner of the subject parcel as a legal residence for more than six (6) months of any given year. The home may not be owned by a corporation, but the owner-occupant may be a benefited person in a private trust or life estate. The owner-occupancy requirement applies to the applicant as well as all subsequent owners of the property.*

The applicant intends to continue use of this property as an owner-occupied dwelling.

4. *At least one off-street parking space shall be provided for an accessory dwelling, in addition to any parking required for the principal dwelling unit on the lot.*

The new accessory structure includes a two-stall garage, in addition to the main shop space of the structure. Sufficient parking is available.

5. *No accessory dwelling unit may include more than one (1) bedroom.*

The proposed unit includes one bedroom.

6. *Units within Accessory Structure: The floor area of an accessory dwelling unit may not be greater than 800 square feet or less than 300 square feet on any lot or parcel five (5) acres in area or less.*

The floorplan submitted with this application, and attached to this staff report, exceeds the allowable floor area by 126 square feet. The applicant is aware that the size will need to be reduced to 800 square feet before a building permit can be issued for this use.

7. *An accessory dwelling unit must be connected to public utilities if available on the lot or parcel. If the lot is serviced by an on-site sewage treatment facility, the applicant must show that sufficient*

(continued)

sewage treatment capacity will be available to meet anticipated needs.

The applicant intends to install water and sewer pipes to connect the accessory building to the primary structure. An additional septic tank and drainfield will be installed to support this structure.

public streets and to provide for appropriate on-site circulation of traffic;

7. The proposed special use is consistent with the master plan, other adopted plans, policies and accepted planning practice; and
8. The proposed special use would not adversely affect the public health, safety and general welfare.

Required Findings of Fact (relating to land use)

1. The proposed special use complies with all applicable provisions of the zoning ordinance and is consistent with the general intent and purpose of the zoning ordinance;
2. The proposed special use is compatible with adjacent land uses and zoning;
3. The proposed special use would be designed, constructed, operated and maintained in a manner that is compatible with the appearance of the existing or intended character of the surrounding area;
4. Adequate public facilities and services are in place or would be provided at the time of development;
5. The proposed special use would not cause a negative cumulative effect, when considered in conjunction with other uses in the immediate vicinity;
6. Adequate measures have been or would be taken to minimize traffic congestion in the

Staff Recommendation

Based on the above findings, staff recommends approval of the special use permit to construct a 3,200 square foot accessory building, which includes an accessory dwelling unit, on Lot 8, Block 1, Copper Ridge Subdivision, with the following conditions:

1. The size of the accessory dwelling unit does not exceed 800 square feet, as verified on a revised floor plan submitted prior to issuance of a building permit.

Staff Analysis

The Planning and Zoning Commission held a public hearing on this request on Wednesday, September 23rd and approved the request. However, due to a publication error in the Bismarck Tribune, a new public hearing must be held in order to meet the City's notification requirements. The public has been re-notified of this request; a new notice was published in the Bismarck Tribune on October 2nd and 9th and new letters were mailed to the owners of nearby properties on October 2nd.

Val Schafer and Shannon Herman are requesting approval of a special use permit to allow the operation of a child care center on Lot 1 less the West 217 feet and less the East 235 feet, Block 1, Airport Expressway 2nd Addition Replat of All of Lots 1 and 2, Block 1.

Adjacent uses include a mix of commercial and light industrial uses to the north, a religious facility to the east, a mix of commercial and light industrial uses to south, and a car wash and oil change facility to the west. Leased office space is located within the same building as the proposed child care facility which also operates as a dance studio.

The proposed child care center is intended to be a temporary solution to address potential need for school-aged children who may need space for a learning environment due to hybrid or remote instruction from any of the local area schools during the COVID-19 pandemic. The current use of the space within the building is a weeknight and weekend dance studio. Operation of the child care center would occur on weekdays and would not overlap.

The following criteria from Section 14-03-08(4)(q) of the City Code of Ordinances (Special Uses/Child Care Center) apply:

- 1) *Each building shall provide not less than thirty-five (35) square feet of interior recreation area per child. Work areas, office areas, and other areas not designed for use of the children may not be counted in this computation.*

The proposed child care center would utilize four rooms for with a total square footage of 3,971 square feet which would allow up to

113 children however since the building is not sprinkled, the maximum allowable occupant load is considerably less. The total number of children at this facility would be 69. This requirement would be met.

- 2) *Each lot shall provide an outdoor recreation area of not less than seventy-five (75) square feet per child. The recreation area shall be fenced, have a minimum width of twenty (20) feet, a minimum depth of twenty (20) feet, be located on the same lot or parcel of land as the facility it is intended to serve, and must be located behind the building setback lines.*

The applicant has verbally requested a waiver from installing the outdoor play area in order to quickly provide space for this proposed temporary child care facility so that the applicant can start operating as soon as possible as a learning center during the COVID-19 pandemic. Staff is supportive of this request with the condition that if the use of the facility continues as a child care center, the applicant will be required to install an outdoor play area within 12 months of approval. There is sufficient space on site to accommodate this if needed in the future.

- 3) *Adequate off street parking shall be provided at the following ratio: One space for each employee and one space for each ten (10) children.*

The proposed child care center would employ seven individuals and caring for 69 students. Total parking space required would equal 14. There are 36 parking spaces on site and only 12 spaces are required for the leased office space. This requirement would be met.

- 4) *Child Care centers shall conform to all applicable requirements of the International Building Code and The International Fire Code as adopted by the City of Bismarck (Title 4 of the City Code of Ordinances – Building Regulations), and all requirements of the North Dakota Department of Human Services.*

(continued)

The proposed building would meet all requirements of the International Fire Code and Building regulations as long as the occupant load does not exceed 69 individuals.

- 5) *Child care centers shall comply with all applicable requirements relating to health and sanitation that have been adopted by the City of Bismarck (Title 8 of the City Code of Ordinances – Health and Sanitation), and all requirements of the North Dakota Department of Health.*

The applicant has indicated all applicable health and sanitation requirements will be followed.

Required Findings of Fact (relating to land use)

1. The proposed special use complies with all applicable provisions of the zoning ordinance and is consistent with the general intent and purpose of the zoning ordinance;
2. The proposed special use is compatible with adjacent land uses and zoning;
3. The proposed special use would be designed, constructed, operated and maintained in a manner that is compatible with the appearance of the existing or intended character of the surrounding area;
4. Adequate public facilities and services are in place or would be provided at the time of development;
5. The proposed special use would not cause a negative cumulative effect, when considered in conjunction with other uses in the immediate vicinity;
6. Adequate measures have been or would be taken to minimize traffic congestion in the

public streets and to provide for appropriate on-site circulation of traffic;

7. The proposed special use is consistent with the master plan, other adopted plans, policies and accepted planning practice; and
8. The proposed special use would not adversely affect the public health, safety and general welfare.

Staff Recommendation

Based on the above findings, staff recommends approval of the special use permit to allow the operation of child care center and a waiver of the outdoor recreation space on Lot 1 less the West 217 feet and less the East 235 feet, Block 1, Airport Expressway 2nd Addition Replat of All of Lots 1 and 2, Block 1 with the following conditions:

1. An outdoor recreation area that meets the requirements of 14-03-08(4)(q)(2) of the City Code of Ordinances must be installed within 12 months of the approval of the special use permit.
2. The applicant must obtain the necessary permit/license for operation of a child care facility from the North Dakota Department of Human Services prior to operating as a child care facility.
